ACI Building Materials Bulletin \$5,500

**\$8,250 for ACI customers and
\$5,500 for HIA members**

aci
AUSTRALIAN CONSTRUCTION INSIGHTS
Research powered by HIA Economics

The ACI Building Materials Bulletin offers the most detailed review available regarding the volume of building materials used in the construction of new detached houses. These building materials include:

- Carpentry
- Trussed roof framing
- Concrete
- Floor coverings
- Insulation
- Brickwork
- Plasterboard
- Tiling
- Sand Infill

The Building Materials Bulletin analyses the usage volumes for each material from 2006 onwards, and provides individualised forecasts out to 2019. The report accounts for changes in building size over time and investigates the trends in the usage of distinct building materials.

The ACI Building Materials Bulletin also considers latest price developments for these key materials across the six state capitals from 2010.

State based data in excel format is available on request for an additional fee of \$1,100.
